LinkedIn: <https://bit.ly/3IZYWWq> | GitHub: <https://bit.ly/3qW74RA> | Portfolio: <https://bit.ly/3x2UGTT>

## SUMMARY

Full-stack web developer leveraging project management background to create software for global communities. Effective as an empowering team player strong in analytical ability. Known as reliable under tight deadlines and passionate about solving problems.

## TECHNICAL SKILLS

**Languages:** HTML5, CSS3, JavaScript, SQL.

**Technologies:** GitHub, JavaScript, Heroku, ReactJS, Node.js, MySQL, MongoDB, Express.js, Handlebars.js, GraphQL, Python, JQuery, Bootstrap, Materialize UI, Bulma.

## PROJECTS

**Music Review Blog** | GitHub: <https://bit.ly/3NZFPzy> | Deployed App: <https://bit.ly/3rbBQ96>

**Summary:** LiveMusicGeek creates a space for writing reviews and networking with bloggers. While previous reviews are open to everyone, opting to login allows for posting and commenting.

**Core Role:** Solo development - set up models, complete typeDefs & resolvers, test in Playground, create routings, set up React components, choose styling, deploy, seed data, present pitch.

**Tools:** Node.js, Express.js, React, MongoDB, GraphQL, CSS3, JavaScript, Heroku

**E-commerce site** | GitHub: <https://bit.ly/3DRvukB> | Deployed App: <https://bit.ly/3Ki9gk9>

**Summary:** With account registration and sign in options, Smagums online site allows the search for products in the site's database. The landing page displays the directory and newest trends.

**Core Role:** Lead backend developer - set up models, set up RESTful API routes, test routes in Insomnia Core, deploy, seed; Collaboration - setup front end pages, choose styling, present pitch.

**Tools:** Node.js, Express.js, Handlebars.js, MySQL, CSS3, JavaScript, Insomnia Core, Heroku

**Park Search Tool** | GitHub: <https://bit.ly/3DVuKuB> | Deployed App: <https://bit.ly/3DTyNHI>

**Summary:** ParkSharkNYC allows search in a location, displaying results including each park's name and address, marked in embedded map. Journal entries are saved in the Memories tab.

**Core Role:** Responsible for results rendering in tool and for project management on Kanban; Collab - setup front end pages, decide on RESTful APIs for data, choose styling, present pitch.

**Tools:** JavaScript, HTML5, CSS3, Bulma, Google Maps API, New York Open Data APIs

## EXPERIENCE

**Product Manager**

2019 – 2020

**China Communications Construction Company Information Technology** Tianjin, CN; remote

*Executed main projects for one-year-old startup, to serve 30 million truck drivers in all provinces and regions in China, including client-matching and automatic toll-payment support.*
